Tomatin Water Edition

Highlands - Schotland

Completing the series is Water, inspired by the water from the Alt-na-Frith burn; our own private water source. The soft and pure water is drawn year round but this particular edition employs a winter-distilled spirit and Sherry butts to enrich the final flavour.

Proefnotitie

Water is delightfully mature, expressing fruity flavours, with hints of chocolate honeycomb and smooth toffee, which are complemented by rich blood orange marmalade. This warming whisky has a long and oily finish.
